

ESD EB - Conductive Anti-Fatigue Rubber

- **Anti-fatigue bubble air cell design.**
Improves worker comfort and productivity.
- **Firm support gives, but stays cleaner.**
Sharper looking facility with lower maintenance costs.
- **Durable homogeneous rubber.**
Long life, will never delaminate.
- **Support structure keeps in place.**
No unsafe movements such as sliding.
- **Beveled edges.**
Added safety; allows people and equipment to pass safely and easily.
- **$10^3 - 10^6$ ohm resistance.**
Meets ESD protective flooring requirements of IEC 61340-5-1.
- **100% Premium Nitrile Butadiene Rubber.**
Better value, prevents discolouring.
- **Durable industrial grade rubber.**
Excellent value providing long-lasting, good-looking life; consistent electrical properties; will never delaminate.
- **Superior heat, chemical, and wear resistance.**
Excellent choice in soldering and other challenging manufacturing environments.
- **Superior resistance to heat, chemicals, and wear.**
- **Antistatic, low tribocharging.**
Minimal charge generation on mat.
- **High quality material with conductive electrical properties.**
When properly grounded, safely removes electrostatic charges from equipment and people to protect your ESD sensitive products.
- **Non-humidity dependence.**
Provides consistent electrical performance regardless of ambient humidity.
- **Dimensionally stable.**
Minimal shrinkage and curling.
- **Rp / Rg :**
 $10^3 - 10^6$ Ohms
- **Thickness:**
12.7mm

MATS	
Art.	Description
ESD 80150	0.9m x 1.5m mat, black

Mat Kits

TO FORM A COMPLETE MAT KIT, ADD THE FOLLOWING:

- Mat grounding cord
- Grounding hardware
- Wristband
- Coil Cord
