

ESD CV - Conductive Homogeneous Vinyl

- **Durable homogeneous vinyl material.**
Economical; provides long life; ideal for high traffic areas.
- **Chemical resistant.**
Use when acids and alkali solutions are present.
- **Light textured finish.**
Easy to maintain.
- **Sturdy, non-curling material.**
Good choice for heavy chairs and carts, lays flat.
- **10³ - 10⁵ ohm resistance.**
Meets IEC 61340-5-1 Floors requirement of <10⁹ ohm for ESD protective flooring.
- **Antistatic, low tribocharging.**
Minimal charge generation on mat.
- **High quality material with conductive electrical properties.**
When properly grounded, safely removes electrostatic charges from equipment and people to protect your ESD sensitive products.
- **Non-humidity dependence.**
Provides consistent electrical performance regardless of ambient humidity.
- **Dimensionally stable.**
Minimal shrinkage and curling.
- **Superior Quality**
- **Rp / Rg:**
10³ - 10⁵ Ohms
- **Thickness**
3.2mm

MATS	
Art.	Description
ESD 80496	1.2m x 2.4m mat, black

ROLLS	
Art.	Description
ESD 80495	1.2m x 12.2m roll, black
