

EARTHING CABLE 120 MM² FOR EARTHING DEVICES

TYPE SG120S100/W

IN CONFORMITY WITH THE INTERNATIONAL STANDARDS IEC 61230 – IEC 61138
Tested at 33,3 kA/1s.

Extra-flexible electrolytic copper cable covered by transparent silicone sheath.

Section 120 mm², length 10 m, complete at the extremities of tinning copper lugs and reinforcements by transparent heat-shrink sheath.

Lug's tube designed to be suitable for three contemporary compressions on two sides by matrix at hexagonal profile.

The second and the third compressions produce the electric contact between cable and lug.

The first compression involves the cable's sheath assuring the perfect seal improving so considerably the resistance to the mechanical stress.
