

Electronic capacitive detector suitable for indoor and outdoor use.

TYPE : RMT 1133/Pocket

Voltage range : 3 to 45 kV

Description

- Electronic capacitive detector suitable for indoor and outdoor use.
 - Four flashing red led-lights indicating the operative voltage presence.
 - Built-in self control check by piezoelectric generator for testing the accurate working of the voltage detector before use.
 - Cylindrical box made of polycarbonate, diameter 58 mm.
 - V-shape (Fork) metallic contact probe.
 - Fixed onto the head of the fiberglass insulating telescopic rod multi-section which allows the device to be transported, into the appropriate carrying bag, attached to the belt of the operator.
 - Complete device dimension:
 - -Folded length: 0,36 m
 - -Unfolded length: 1,16 m
 - -Total weight: 410 g
- Supplied in a suitable waterproof bag with eyelet for belt attachment.
